

CommunityNationalBank

## Best of Community Banking Awards 2021

### Community National Bank / Architectural Design / Program Summary

In 2020, Community National Bank upgraded and relocated their headquarter location to 500 West Illinois Avenue in downtown Midland, TX. Since 1984, CNB has provided a strong, locally owned, independent financial institution and are continues to grow and expand today. To show their commitment and how the Bank is moving forward, management decided it was time to transition their headquarters to a twelve-story tower in downtown Midland.

The vision for the space was to create an environment where employee comfort and satisfaction were paramount. CNB management fulfilled the vision by creating a superior Employee Lounge allowing employees to enjoy panoramic views of the city during breaks, lunches, or celebrations. The space is highlighted with high-end finishes and seating for over 50 at a time. The impressive 360-degree teller area in the ground floor lobby was designed to allow employees to interact with customers on a more personal basis as opposed to a traditional teller line. Other outstanding features include two video display walls, electrostatic glass throughout the twelfth floor, and a 26' custom-built boardroom table. Proudly, the project came in under budget at \$9.4 million, and has become 51,300 square feet of employee and customer luxury.
