

Best of Community Banking Awards – Pandemic

Program Summary Pandemic Response

When the pandemic occurred, it was the mission of FBSW to ensure that our employees and customers were provided a healthy and safe environment in which to work and do business. FBSW took this opportunity to really show both our employees and customers, how much we truly value them. Our employees were given the support, resources, and flexibility they needed in order to take care of themselves and their family, while being kept financially whole. To our customers, we modified our operations and accommodated them accordingly, so that they could safely complete all their banking needs. When you take care of your employees and customers, they will always take care of you!
